Archivo.sql

Ejecutar Docker compose apartir del yaml

```
| Jacker-compose up -d | Building 0.0s (0/0) | Running 3/3 | |
| Network practica9_docker_default | Created |
| Container practica9_docker-postgres-1 | Started |
| Container practica9_docker-padmin-1 | Started |
| Container practica9_docker-padmin-1 | Started |
| Public | Public | Public |
| Public | Public | Public |
| Public | Public | Public | Public |
| Public | Public | Public | Public |
| Public |
| Public | P
```

Contenedores en ejecución

pgadmin en loclahost 8280

Docker compose logs/ IP de nuestros servidor

practica9_docker-pgadmin-1 | ::ffff:172.18.0.1

Creación y configuración del servidor

Creación de la base de datos

Creación de la tabla
